Subject: RE: questions about Fig 4-1 in pollinators book

No,
They are not the same,
But these words are to ... general and generic and lead to confusion....

Seriously though...

Dave, we need to speak about whether we want to modify the terms ... I want to see what EFSA use in their document ... and what we said in the EPA White Paper.

I will check on this tomorrow or this evening
Dave, what thoughts do you have?

Tom and Dave, I'm still wondering whether "generic" in the second box is the same as "general" in the first box...just trying to make connections (or disconnects) where they exist.

Gentlemen,

I'm working on figures for Wiley and hope you can answer the questions below.

Thanks!
Mimi

Tom,

I'm working to get the tables and figures in shape for Wiley, and am hoping you can help me out with the first box in Figure 4-1. The text does not seem to make sense...something seems to be missing.

General Protection Goals of a Regulatory Authority

General Protection goals are overarching, reflect societal values, and can be the charge of an agency e.g. protection of human health and the environment.

~~supported the when specific protection goals are met.~~

And in the second box of the same figure, is "generic" protection goal the same as "general"? I'd like to keep the terminology consistent.

Specific Protection Goals for Risk Assessment

Specific protection goals are consistent with and support *generic* protection goals, e.g., protection of pollination services of honey bees. Knowledge of whether a specific protection goal is met is based upon whether the assessment endpoints are met.

Sorry to bother you...but there may be more questions. We are expecting a production schedule from the publisher soon, and you'll be the first to know.

Mimi
